

CURRICULUM VITAE OLGA KRESTININA

ADDRESS: Institute of Theoretical and Experimental Biophysics Russian Academy of Science, 142290, Pushchino City, Moscow region, Russia

PHONE: (495)9239668 (ext 267)

FAX: (495)9240493

DATE AND PLACE OF BIRTH: 24.09.1967,
Moscow region, Russia

EDUCATION:

1986-1991, graduated from Chemical-Biological Department of Tula Pedagogical State Institute;

1999-2003 – Post-graduated Student of the Institute of

Theoretical and Experimental Biophysics of Russian Academy of Sciences

2005 – PhD Thesis “Phosphorylation of rat brain mitochondrial proteins”,

(Certificate of Degree # 158017).

POSITION HELD:

1991-1999 - school teacher

1999-2005 – Junior Scientist of the Institute of Theoretical and Experimental Biophysics, RAS;

2005-2008 - Scientist of the Institute of Theoretical and Experimental Biophysics, RAS.

2008-present – Senior Scientist of the Institute of Theoretical and Experimental Biophysics, RAS.

RESEARCH INTERESTS:

Processes of transformation of energy in mitochondria (brain), permeability transition pore, Ca-transporting system of mitochondria, ATP synthase/hydrolase complex (subunit c of ATPase), Ca-binding proteins, phosphorylation /dephosphorylation of mitochondrial proteins, aging.

FELLOWSHIP:

2002-2012 - Otto-von-Guericke University, Institute of Neurochemistry, Magdeburg, Germany.

RESERCH PROJECTS:

1. 2005-2007: “Regulation of mitochondrial function by second messenger system. The role of 43 kDa and 17 kDa phosphoproteins in the induction of apoptosis in mitochondria” – supported by the Russian Foundation for Fundamental Research (RFBR) Fund, # 05-04-49487 to Prof. Yu.V Evtodienko.

2. 2006-2008: "New mechanisms of involvement of peripheral benzodiazepine receptor and its selective ligands in the initial stages of programmed cell death in brain mitochondria" – supported by the RFBR # 06-04-48763 to Dr. T.S. Azarashvili.
3. 2008-2010: "Regulation of mitochondrial functions by cyclic nucleotides. Role of 46 kDa phosphodiesterase (CNP) in the initial stages of apoptosis in mitochondria" – supported by the RFBR # 08-04-00723 to Dr. O.V. Krestinina.
4. 2009-2011: "Mechanisms of regulation of cytochrome c release from pancreatic mitochondria as a determining factor of induction of acinar cell apoptosis during pancreatitis" – supported by the RFBR # 09-04-00739 to Dr. I.V. Odinokova.
5. 2011-2013: "Investigation of antioxidants effects on the oxidative stress in rat brain mitochondria for elucidating a novel protective mechanism in aging" – supported by the RFBR #11-04-01321 to Dr. O.V. Krestinina.
6. 2012-2014: "The role of post-translational modification (phosphorylation) of 2', 3'-cyclic nucleotide 3'-phosphodiesterase(CNP) in regulation of mitochondrial functions and the initial stages of programmed cell death under neurodegeneration"- supported by the RFBR #12-04-00671 to Dr. Yu.L. Baburina
7. 2013-2015: "Identification of the new protein-targets for neuroprotection in brain mitochondria, initiating induction of the programmed cell death (apoptosis)" supported by the RFBR #13-04-00935 to Dr. T.S. Azarashvili.
8. 2014-2016: " Investigation of melatonin role in TSPO-modulated regulation of mPTP in rat liver and brain mitochondria in aging" supported by the RFBR #14-04-00625 to Dr. O.V. Krestinina.
